Đặng Anh Quốc

Intern

Profile

0385401164

anhquoc06122005@gmail.com

Portfolio: anhquoc-portfolio.vercel.app

GitHub: https://github.com/anhquoc061205

Location: Phường Long Thạnh Mỹ, Thành Phố Thủ Đức, TP. Hồ Chí Minh

Skills

Programming Languages: Java, JavaScript, HTML/CSS, C# (Basic)

Frameworks: Spring Boot, React.js, Node.js

Databases: PostgreSQL, MySQL, SQL Server

Tools: Git, Supabase, REST API

Other: Tailwind CSS, AI API Integration

Interests

Playing soccer, listening to music.

Objective

Short-term:

- Seeking an Intern/Junior Developer position to apply Java Spring Boot and React.js knowledge to real-world web application development.
- Improve skills in designing RESTful APIs, integrating AI, and working in a professional environment.

Long-term:

- Become a Software Engineer specializing in Web system development and AI-integrated technology products.
- Participate in designing large-scale system architectures, optimizing performance, and improving user experience.

Personal & Group Projects

https://aistudyhub.cloud 05/2026 - 08/2026

Tech stack: Supabase (PostgreSQL), REST API, AI Streaming, Git/GitHub
Role: Back-End Developer | Team size: 5

- **Database Design:** Designed PostgreSQL schemas on Supabase and configured role-based Row Level Security (RLS).
- **API & AI:** Developed business endpoints and integrated AI with streaming responses.
- **Security:** Configured authentication/authorization and managed sessions on Supabase.
- **Deployment:** Deployed the application to production using a custom domain and collaborated with the team through Git.

https://spotify-clone-wheat-delta.vercel.app 06/2025 - 07/2025

Tech stack: HTML5/CSS3, JavaScript (ES6+), Web Audio API, Git/GitHub
Role: Front-End Developer | Team size: 1

- **Audio Playback:** Built music control features (play, pause, next/previous, seek bar, and volume control) using the HTML5 Audio API.
- **Dynamic UI:** Developed dynamic track listing and highlighted active songs using Vanilla JavaScript DOM manipulation.
- **UI Design:** Designed a modern user interface matching Spotify's style with CSS Flexbox/Grid for a fully responsive layout.
- **Deployment:** Deployed the web application to Vercel and managed source code using Git/GitHub.

Education

Software Engineer 2023 - Now

FPT University

- **Foundation:** OOP (Java, Basic C#), Databases (MySQL, SQL Server), and Software Architecture.
- **Foreign Language Skills:** Basic English communication: participated in an academic exchange program in Malaysia.
